

Message from the Director's Desk:

June 2021

"Educating the mind without educating the heart is no education at all."- Aristotle

Dear Parent,

I am happy to welcome you to the 2021-22 school year! We recognize that to be successful in school, our children need support from both the home and school. We know a strong partnership with you will make a great difference in your child's education. As partners, we share the responsibility for our children's success and want you to know that we will do our very best to carry out our responsibilities.

In education, research has shown that teaching quality and school leadership are the most important factors in raising student achievement. Professional development is also the only way educators can learn so that they can better their performance and raise student achievement. The IAELC Team was back from their summer break on 2nd June, 21 and since then they have been having enriching professional development sessions along with the Indus Altum International School Team. The entire month of June, the Team is going to have lifelong learning experiences through the professional Development Modules.

As we re-open the IAELC online school on the 15th of June, all grades will begin with a 3 weeks Bridge Course. The teachers will help children revisit concepts taught in the previous grade. This will help the teachers to assess the prior knowledge that the children possess. We call this the 'Entry Level Assessment' which will be in the form of worksheets. Like last year, every Friday the Teachers will be emailing you the 'Weekly Transaction Report (WTR)' which will give you an idea of the schedule of the coming week and the resources that need to be arranged for your child. The learning platform for the children for this year will be MS Teams. We have created a new email address for the children with the 'iais.in' domain name. We will be blocking all email ids of children that we created last year.

Routines help kids learn to take charge of their own activities.

While parenting is a thankless job, we get immeasurable fulfillment when we see our children accomplish their dreams in life. Now is the time to start preparing our children for a back-to-school routine, especially since that routine may look different than it was last year. Getting them into a routine will work the best for the children Because routines give them a sense of security and help them develop self-discipline.

Children, like the rest of us, handle change best if it is expected and occurs in a familiar routine. A predictable routine allows children to feel safe, and to develop a sense of mastery in handling their lives. Structure and routines teach kids how to constructively manage themselves and their environments.

We are looking forward to a productive partnership with you to ensure our children can achieve their highest potential.

Warm regards,

Ayesha Baig

Director Preschool
